

# Soft Tissue Surgery

Our Soft Tissue Surgery team perform a wide range of investigations and surgical procedures including treating many congenital and acquired conditions, as well as surgical oncology and trauma. They routinely treat the following conditions as well as dealing with emergency cases: Brachycephalic Obstructive Airway Syndrome (BOAS), laryngeal paralysis, urinary incontinence treatment, wound management and reconstruction, portosystemic shunts (PSS) and ear issues. They also offer a comprehensive range of minimally invasive procedures from ovariectomy and biopsies to pericardiectomy.

Being part of a large multi-disciplinary hospital allows the Soft Tissue Surgery team to take a truly multi-disciplinary approach to patient care, working collaboratively with colleagues in different disciplines to optimise outcomes. The on-site MRI, CT, digital radiology, ultrasound facilities and team of Diagnostic Imaging specialists help to facilitate timely and accurate diagnosis with our ICU specialist service helping with patient after care.

To support a smooth referral process and for transparency and predictability of costs for your clients, we offer a number of fixed price procedures. Here is a sample of them.

Simple BOAS surgery	£4,000	Simple Unilateral TECA	£4,000
<p>Procedure includes:</p> <ul style="list-style-type: none"><li>● An initial consultation with a member of our specialist-led surgery team</li><li>● The following preoperative investigations (if applicable):<ul style="list-style-type: none"><li>○ Thoracic radiographs</li><li>○ A full upper airway examination</li></ul></li><li>● The BOAS surgery itself (addressing the nares, soft palate and sacculles)</li><li>● General anaesthesia (performed by our specialist-led Anaesthesia team)</li><li>● Hospitalisation for up to two nights (as required)</li><li>● 24-hour care provided by our onsite nurses and veterinary surgeons</li><li>● Postoperative re-examination appointment</li></ul>		<p>Procedure includes:</p> <ul style="list-style-type: none"><li>● Initial consultation with a member of our specialist-led surgery team</li><li>● Pre-operative CT of the surgical area led by our specialist-led diagnostic imaging team</li><li>● The TECA surgery itself including general anaesthesia provided by our specialist-led Anaesthesia team</li><li>● Hospitalisation for up to two nights (as required)</li><li>● 24-hour care provided by our onsite nurses and veterinary surgeons</li><li>● Postoperative re-examination appointment</li><li>● This package excludes brachycephalic breeds and patients with more complex ear disease such as a cholesteatoma</li></ul>

<p>Procedure includes:</p> <ul style="list-style-type: none"><li>● Initial consultation with a member of our specialist-led surgery team</li><li>● Pre-operative thoracic and cervical radiographs led by our specialist-led diagnostic imaging team</li><li>● The tieback surgery itself including general anaesthesia provided by our specialist-led Anaesthesia team</li><li>● Hospitalisation for up to two nights (as required)</li><li>● 24-hour care provided by our onsite nurses and veterinary surgeons</li><li>● Postoperative re-examination appointment</li></ul>		<p>Procedure includes:</p> <ul style="list-style-type: none"><li>● Initial consultation with a member of our specialist-led surgery team</li><li>● The surgery itself including general anaesthesia provided by our specialist-led Anaesthesia team</li><li>● Up to one night of hospitalisation (if required)</li><li>● 24-hour care provided by our onsite nurses and veterinary surgeons</li><li>● Postoperative re-examination appointment</li></ul>	
Pre-operative blood test and post-operative medications are not included as this can vary significantly between patients.			

## A multi-disciplinary approach

We have access to the expertise and support of our Emergency and Critical Care, Anaesthesia, Diagnostics Laboratory, Oncology, Physiotherapy and Orthopaedic teams if needed. This benefits all patients and demonstrates the real advantage of referring your cases to a truly specialist and multidisciplinary referral centre.

### To contact us

To refer a routine case please go to the referral form on our website  
[www.dwr-vetspecialists.com/vet-professionals/referring-a-case/refer-a-routine-case-online/](http://www.dwr-vetspecialists.com/vet-professionals/referring-a-case/refer-a-routine-case-online/)

If your case is an emergency please call the Client Care team on **01638 572012**.  
 Your clients will be under the care of a Client Case Manager during their time with us.
